

Managing and Budgeting Money: How to easily budget and manage your money in a simple step by step approach: (BONUS: FREE BUDGETING TEMPLATE) Money management, ... Financial freedom, Personal finance)

Managing and Budgeting Money: How to easily budget and manage your money in a simple step by step approach We all know about the famous saying that you will reap what you sow but how many of us stop to think about how this quote really relates to our lives? Well, many of us start off their employment years with great dreams about how they will achieve so much within a very short time. You will hear fresh college grads talking about how they will work hard to climb up the corporate ranks, how they will invest in stocks, real estate and so many other areas of life. But when the first paycheque shows up at the bank account, our thoughts and priorities shift greatly; we start thinking about how we should furnish our homes, how we should buy a brand new car or buy a second car, how we should move to a new neighbourhood, how we should start eating out and so many other thoughts. All these mean that we will be spending. And by the time it is the 15th day of the following month comes, we are dead broke and asking for salary advances from our employers and checking out payday loan sites. Credit cards also become a personal favorite because you can buy what you cannot afford. When you continue with this trend, it doesn't take long before you discover that you have immersed yourself in debt and that you are paying more for credit. And when this happens, you soon start missing credit card payments and payments for other forms of credit. This can be your worst nightmare irrespective of how much money you earn because it not only messes up your financial goals; it can also mess up your career and your family. Well, there is nothing wrong with living the lifestyle you want to live but when this affects your progress in life as far as finances are concerned, then you need to take action. The truth is that you can never become rich by spending. When you sow spending, you reap poverty. You can never

move ahead in life by being the biggest spender whether you do it because you have convinced yourself that your job demands a certain lifestyle or not. When you are constantly broke when you are working or running a business, something is definitely wrong with the way you handle your money. Think about it; it takes you about 8 hours a day for 4 straight weeks to make the money you make so it is best to use your money as if it means something to you. So unless you don't mind having to rely on social security in your sunset years, then proper financial management and budgeting skills are essential. But since I know you have had your episodes of not achieving your financial goals because you didn't have the money or are forced to work on a job that you hate because you don't have an option, I will offer all the help you need to help you out of this endless cycle. And after reading this book, you will know how to save, how to budget and how to invest the money that you save.
