

## Delay the Disease -Exercise and Parkinsons Disease (Book)

David Zid, an ACE, APG certified trainer, has collaborated with orthopedic surgeon, Thomas H. Mallory, M.D., who is afflicted with Parkinsons disease, and Jackie Russell, RN BSN CNOR, in the development of a Parkinsons specific fitness program designed to proactively minimize tremors and improve flexibility, stability, balance and strength. This program empowers the person with Parkinsons Disease to take control, helps with maintaining independence, and provides hope! Delay the Disease contains colorful photographs of Zid demonstrating each move, as well as recommendations for exercise frequency, modification and how to adjust the workout as one improves. Parkinsons patients participating in Zids fitness program notice improvement in walking, dressing and maintaining balance. Exercises are divided into categories (wake up call, walking and balance, cardiovascular, strength, facial and vocal, and night-time stretching).
