

# Playtionships: The New Paradigm: An Intimate Account of How I Created the Guidelines that Set Me Free

Everything is customizable in this day and age, so why shouldn't our relationships be? We no longer have to conform to one way of being, to the limitations of the words and stereotypes that try to define us. This is an intimate account of my first experience in what I call a Playtionship, which led me to create The Playtionship Guidelines. The Guidelines can be used in Polyamorous or Monogamous relationships to create new, previously indefinable relationships. Included are excerpts from my diary, as well as the worksheet Boundaries, Desires & Agreements as tools to create your own Playtionship. Relationships are really on a spectrum from monogamous to polyamorous, and our sexuality is on a spectrum from straight to gay, from kinky to vanilla, and everything in between. Once you combine conscious language and a hunger to explore, you can use these guidelines to customize your relationship and safely create play in your current dynamic or in a new one.
