

# Public Sector Accounting and Budgeting for Non-Specialists

Public sector managers are constantly confronted by financial documents such as budgets, balance sheets and cash flow statements, yet most do not have a financial background. By approaching the subject from the point of view of how managers use the information, this book enables those studying or training to become public sector managers to get a better understanding of financial documents and communicate effectively with the financial people in their organization. A basic understanding of the principles and rules is instilled, in a concise way, and illustrations are used to encourage an appreciation for the value of financial information for decision making.
