

Financial Planning Australia: Protecting your family. Prosperity for your future.

Studies show that working with a financial adviser can add approximately 7% extra growth per year to your investments (including Super), and that people who use advisers are more relaxed and less stressed about their finances. While over 60% of Australians would like to work with a financial adviser, only about 17% of people in Australia have sought financial advice. The three most common reasons people give for not talking to a financial planner are: they can't afford it, they are not wealthy enough to need one, or they know so little about financial planning that they're afraid they'd look foolish asking questions. I've written this book to give you a bit of an idea of how financial planning works, how much it costs, and how it can help you to protect your family today, while building your assets for a comfortable future. Financial planning doesn't need to be expensive. You can generally pay for it out of your Super, and the fee charged to your Super will usually be covered several times over by gains made due to the advice you get. Financial planning isn't just for the wealthy; it's something everyone can use to build their wealth!

That's why we always seek to understand you and your business. We added new services: financial planning (in 2001), technology joining its network with 20 other practices across Australia for .
